Summary

Passionate, quality-focused and super quick learner backend developer with more than 3 years experience seeking a backend developer position at your company. I am to build secure, scalable systems using modern backend technologies and contribute to exciting SaaS projects while growing with the team.

Experiences

- Pxlhut as Backend Developer, Sylhet, Bangladesh (continue)

- Shaderbytes as Full Stack Developer, Kolkata, India

- Unisight Technologies as React Developer, India

Technical Skills

- Backend: Node.js, Express.js, NestJs, TypeScript, JavaScript
- PostgreSQL, MongoDB, Redis
- Frontend: React.js, Next.js, Redux
- DevOps & Cloud: Basic knowledge of Docker, CI/CD, Git
- Architecture: REST APIs, JWT, WebSockets, Payment Gateways

Projects

- Talento App

Developed a secure backend for a talent management platform using Node.js, Express, and MongoDB. Integrated authentication with JWT, file uploads with Multer, real-time communication via Socket.io, and email services with Nodemailer.

- Course Management

Built a backend for a course management platform using Node.js, Express, and MongoDB. Implemented RESTful APIs, file uploads (Multer/S3), and Stripe payment integration.

Education

- Degree in BSc, Susong Durgapur Govt. College

Courses & Certificate

- Web Development from Programming Hero (Batch-5)
- Label 2 Course from Programming Hero (Batch-1)

Language

Bangla and English
